SDG Financing in Lao PDR

Supporting Data Sets

A Synthesis Report - Complimentary to the
2021 Development Finance Assessment

The Joint Sustainable Development Goals (SDG) Fund is an innovative instrument to incentivize the transformative policy shifts and stimulate the strategic investments required to get the world back on track to meet the SDGs. The UN Secretary-General sees the Joint SDG Fund as a key part of the reform of the UN's development work by providing the "muscle" for a new generation of Resident Coordinators (RCs) and UN Country Teams (UNCTs) to really accelerate SDG implementation.

To date it has funded 101 joint programs focused on integrated social protection or SDG finance, it has stimulated over 1,000+ partnerships working together alongside the UN to support the SDGs and it has tested over 200 innovative solutions to accelerate the 2030 Agenda.

The Joint SDG Fund is a multi-partner trust fund. This means contributions it receives are not entity-specific, but aim to support broader UN system-level functions. In this way, it differs from restrictive earmarked funding which can fuel competition and hamper cooperation among UN entities. This type of pooled funding used by multi-partners trust funds, like the Joint SDG Fund is widely considered 'multilateralism-friendly' – and is much more suitable for the integrated support at scale essential for achieving the 2030 Agenda. Flexibility in reallocating funds has also proven critical for rapid responses to the COVID-19 pandemic.

The UN Capital Development Fund makes public and private finance work for the poor in the world's 47 least developed countries (LDCs).

UNCDF offers "last mile" finance models that unlock public and private resources, especially at the domestic level, to reduce poverty and support local economic development.

UNCDF's financing models work through three channels: (1) inclusive digital economies, which connects individuals, households, and small businesses with financial eco-systems that catalyze participation in the local economy, and provide tools to climb out of poverty and manage financial lives; (2) local development finance, which capacitates localities through fiscal decentralization, innovative municipal finance, and structured project finance to drive local economic expansion and sustainable development; and (3) investment finance, which provides catalytic non financial structuring, de-risking, and capital deployment to drive SDG impact and domestic resource mobilization

DISCLAIMER

The designations employed and the presentation of material on the maps and graphs contained in this publication do not imply the expression of any opinion whatsoever on the part of UNCDF or the Secretariat of the United Nations or any of its affiliated organisations or its Member States concerning the legal status of any country, territory, city or area or its authorities, or concerning the delimitation of its frontiers or boundaries.

Integrated National Financing Frameworks (INFFs) provide a framework for financing national sustainable development priorities and the SDGs at the country level.

Integrated National Financing Frameworks (INFF)

Mobilizing resources, both domestic and global, to support sustainable development remains a key challenge for many developing countries. In 2015, world leaders met in Addis Ababa, Ethiopia to agree upon a new global framework for financing the 2030 Agenda and the 17 Sustainable Development Goals (SDGs). At the heart of the Addis Ababa Action Agenda are national sustainable development plans and strategies supported by integrated national financing frameworks — or INFFs.

A country's sustainable development strategy lays out what needs to be financed. INFFs spell out how the national strategy will be financed and implemented, relying on the full range of public and private financing sources. INFFs are a planning and delivery tool to help countries strengthen planning processes and overcome obstacles to financing sustainable development and the SDGs at the national level. <https://inff.org>.

Integrated National Financing Frameworks (INFF)

This report has been developed by UNCDF within the framework of the UN SDG Funded Project "Efficiency and optimisation of Lao PDR's public budget to finance the SDGs through the National Plan".

The project brings together UNDP and UNCDF and UNFPA to support the Government of Lao PDR to develop their Integrated National Financing Framework (INFF) that will be used to support the countries SDG commitments. INFFs provide a framework for financing national sustainable development priorities and the SDGs at the country level.

This research paper has been drafted as a complementary to the Development Finance Analysis (DFA 2021) that is being developed by UNDP. This body of work extends the DFA, analysing the financial flows towards the SDGs inclusive of all forms of external finance, FDI, ODA and the public sector budget.

SDG Financing Flow	SDG Financing Flow Description
Year	Year of Data
GDP	Value of GDP (US\$ million - current)
C%	SDG Flow as Crude % of GDP
SDG Com	Expenditure Compliance Score to SDG (1 to 3)
Gov Pri	Government Priority Score to SDG (1 to 3)
Score	SDG Alignment Score (SDG Com x Gov Pri)
W% of GDP	Weighted % of GDP fostering SDG & Gov Priorities
Amount US m	Amounts Fostering SDG & Gov Priorities (US\$ m)
W Amounts	W Amounts Fostering SDG & Gov Priorities (US\$ m)

SDG Financing Flows

- All data has been sourced from official documents and or recognised development data bases that are within the public domain.
- The methodology applied has been developed by the author of this report, and scoring has been undertaken accordingly
- The original data sets can be obtained in MS Excel format from UNCDF
