

NEPAL FINANCIAL INCLUSION PORTAL

The **Nepal Financial Inclusion Portal** is powered by a Regulatory Technology (RegTech) platform that combines reporting, mapping with an analytics tool. The foundation of the RegTech platform is geographic (spatial) data. The objective of the portal is to help Nepal Rastra Bank and Government of Nepal identify:

- Which areas need financial access points?
- Why there is a need for it?
- What scale should the financial access point operate?

The portal also enables commercial banks, development banks, finance companies, non-bank payment service providers and microfinance institutions to report data in a systematic manner. Based on these analytics, the central bank can mandate the development of a financial infrastructure across each of the 753 local bodies in Nepal.

Various usage of the data from Nepal Financial Inclusion Portal:

CENTRAL BANK

- To track progress of financial inclusion across Nepal.
- To implement data driven policies.
- To ease the information flow across various departments within NRB and between financial institutions and NRB.

FINANCIAL SERVICE PROVIDER

- To track their organization's overall growth.
- To plan future activities (businesses).

STAKEHOLDERS

- To geo-localize all financial points in Nepal.
- To analyze the market for potential projects and track the outreach of financial access across Nepal.
